

Positive feed back mechanism  
PFBM

DFML

Starts continues never stop -

implies that when there is deviation from normal range, the response of the system is to make it worse

① Clothing pfbal deviation/larger mechanism

② Breast feeds pfbal -

③ Nursing is better pfbal.

# Positive feedback mechanism creates

"vicious cycle" leading away from homeostasis that might lead to death.

① then ② clothing factors - DFML 12 cycles

1-1 15 mins per group -
